## Summary

Passionate Full Stack Developer with expertise in building scalable, high-performance web applications using modern technologies. Seeking to leverage my skills in frontend and backend development to create innovative, user-centric solutions.

## Education

### Post Graduation in Web Development

Conestoga College, Kitchener, ON

Sept 2022 – Dec 2023

GPA: 3.48/4

### Bachelor of Technology in Computer Science

Silver Oak College of Engineering and Technology

Aug. 2018 – June 2022

CPI: 8.51/10

## Skills

**Frontend:** React.js, Next.js, Redux, Babel, React Hooks, TailwindCSS, Shadcn/ui, HTML5, CSS3/SASS

**Backend:** Node.js, Express, GraphQL

**Database:** MongoDB, SQL, Supabase, Prisma

**Authentication Security:** Clerk, Zod

**Development Practices:** Agile Methodology, Design Thinking, REST APIs

## Projects

**Innsync** | Next.js, TailwindCSS, Shadcn/ui, Supabase, Prisma, Clerk, Zod, Vercel

Jan 2025 - Mar 2025

- Developed a modern web application for short- and long-term homestays and experiences, integrating both frontend and backend functionalities for a seamless user experience.
- Implemented dynamic routing, server actions, and nested layouts for an optimized user experience.
- Designed a responsive UI using TailwindCSS and Shadcn/ui, ensuring theme management and consistent styling.
- Integrated Clerk authentication for secure user login and session management.
- Utilized Supabase and Prisma for database management, including image uploads and storage.
- Ensured data validation and security using Zod and implemented CRUD operations efficiently.

**Cinechum** | React JS, MongoDB

Jun 2024 - Aug 2024

- Designed and implemented multiple sections with current API data such as Home, Popular movies, top rated movies, upcoming movies to categorize and display movies effectively.
- Created a detailed movie information page showcasing movie name, duration, budget, review, earnings, genre, IMDb review, and number of reviews.
- Integrated theme toggle functionality, to switch between dark and light modes and implemented search options for user.

**Github Finder** | React JS

Feb 2024 - April 2024

- Developed a ReactJS based GitHub user search application using the GitHub API to fetch user details and repository
- Enabled users to view detailed profile insights, including repositories, followers, and location.
- Integrated smooth navigation and UI enhancements for an optimized user experience.

## Experience

### Software Engineer

PROMOUNT Technologies LLP

May 2022 - Aug 2023

Ahmedabad, Gujarat

- Developed and maintained ReactJS-based UI components for a cloud-based hospital admin dashboard, improving user interaction and efficiency.
- Designed and integrated REST APIs using JSON, enabling seamless communication between frontend and backend.
- Built dynamic user interfaces with ReactJS and Redux to ensure responsiveness and accessibility.
- Collaborated with cross-functional teams to align UI development with agile methodologies and best coding practices.

### Software Engineer Intern

PROMOUNT Technologies LLP

Jan 2022 - April 2022

Ahmedabad, Gujarat

- Implemented a user-friendly interface allowing users to explore detailed product pages, add items to the cart, and proceed to the payment page effortlessly.
- Integrated user authentication using toastify for registered members to access personalized dashboards, enabling them to track their order history conveniently.
- Curated and customized web pages using CSS frameworks such as TailwindCSS and SCSS, to streamline development processes and enhance styling flexibility.
